## REVIEWER INDEX FOR VOL 54 (2001)

Many thanks and deep appreciation are due to all the reviewers listed here for the time and effort they have put in to describe and critique books for the benefit of the engineering science community.

References to AMR (at the end of each entry) are coded in the form nRm, where n is an integer which gives the AMR issue number (1 for Jan, 2 for Feb, etc), R stands for Review, and m is the number of the review within the issue book review section. Under each reviewer's name the books are sorted alphabetically by title.
